

Vacuum Boiler (T6)

Product Details [PDF](#)

120,000m²
Production Base

6,000m²
R&D Center

20,000 Tons
Annual Capacity

60,000
Total User Number

Company Profile

Fangkuai Boiler Co., Ltd. was established on 8th Jan. 1998. With the registered capital of over 100 million, Fangkuai Boiler group has grown into a high and new tech enterprise, integrating researching & developing, manufacturing and marketing of clean fuel boiler and clean combustion technology.

Fangkuai is a Licensed Lever A boiler manufacture and Level D1/D2 Pressure Vessel manufacture company, with the certificates of ISO9001 Quality Control System and International Certification Network (IQNET). With a 120,000 square meter production base, we become one of the few boiler manufacturers who have digital production capacity in China.

We also possess an national level boiler laboratory which can simulate all kinds of working conditions. Fangkuai Boiler Co., Ltd. was established on 8th Jan. 1998. With the registered capital of over 100 million, Fangkuai Boiler group has grown into a high and new tech enterprise, integrating researching & developing, manufacturing and marketing of clean fuel boiler and clean combustion technology.

Product Introduction

Rated thermal power: 0.7-2.8MW

Rated thermal efficiency: $\geq 105.5\%$

Applicable fuel: Natural gas, liquefied petroleum gas, etc.

Applications: Schools, residences, etc.

Fangkuai T6 Vacuum Hot Water Boiler is the upgrade generation adopting Ultra-speed smoke cooling tube. In this model, we also adopt U-type Fire Tube and full pre-mixed combustion technique. Gathering those high technologies, Fangkuai T6 Vacuum Hot Water Boiler can achieve better using effect, bring users much convenience, saving users much expend.

Features:

Simple system, Easy installation, Strong Water Quality Adaptability, Multi-Boiler-Controlled Intelligent System

>100%
Thermal efficiency

$\leq 80\text{mg/m}^3$
Ultra low emission

20 years
Long life

5 heavyWater
level protection

Good sealing
Very low heat loss

PLC Intelligent
control system

up to date Heat
exchange element

Cloud Service 3.0
Online Monitoring

Product Features

Simple system, Easy installation

The built-in exchanger in boiler can directly offer needed water , can offer multi-circuit water with different temperature.

Strong Water Quality Adaptability

The condensing water flows out of the Ultra-speed smoke cooling tubes, and the heat transfer space is designed in large volume, uneasy to form scale.

Multi-Boiler-Controlled Intelligent System

Modular boiler can realize the multi-control of more than one boiler, which can adjust the heating demand through intelligent operation.

High Thermal Efficiency and Low Exhaust Emission

Due to the integration of boiler proper and burner and perfect structure of Ultra-speed smoke cooling tubes, Fangkuai T7 Vacuum Hot Water Boiler has high thermal efficiency and low NOx emission less than 30mg/m^3 .

Service Philosophy

Our Service Philosophy: Think as a customer !

Fast Response

Telephone or Online service, we will be your side, any time.

Cloud Service 3.0

Intelligent online service, automatic diagnosis, troubleshoot boiler failure.

After-sell Service

Professional installation and maintenance engineers for international customers.
